**Subject:** To the Commissioners about the pipeline

PSC Commissioners  
Sirs,

September 25, 2018

And now, with the testimony of Hector Alatorre, we see what is really behind the "need" for Dominion to purchase SCANA in such a hurry! They are only interested in getting their foothold in SC for the pipeline they are building.

Do you not see or understand that if you allow this merger, they will come in and nothing you will say or do then will stop any plans they already have in place They will not be coming before you to allow them to do anything.

Eminent domain has been used by them in other states to strip everyone in their path of their land with no compensation! You will be responsible for the destruction of South Carolina's land if you allow this to continue! If you allow the merger, you then will never be able to go back and undo the ruination you will have allowed to happen.

DO NOT allow the merger....it is NOT a good thing!!!

Sandra Wright
